RESUME

I am a lover of technology, innovation and how it can impact the world. I am a faithful believer and promoter of reinvention, creativity and continuous improvement. And as a life objective, I would like one day to generate something positive and free of use for people.

PROFESSIONAL EXPERIENCE

ACID Labs — Lead of Data Engineering

Lead Data Engineer with the following responsibilities:

- Pre-Sales of projects, architecture and estimation ideation.
- Creation of the Beesley product, a generative B2B commercial sales chat using Beesley as the core on AWS
- Learning Path creation for Data Engineers
- Training for the Google Professional Data Engineer Certification
- Creation of technical proposals for the company's pre-sales
- IA Gen Chatbot for legal documents (PoC)
- LakeHouse with Delta and DBT (PoC)
- Real Time Dashboards with KSQL and Bokeh (PoC)

KAVAK — Senior Software Engineer

Software Engineer for the global data platform Architecture team at Kavak.

- Development of a wrapper for Tableau permissions via API
- Framework for compacting small files with Spark on Glue and ECS
- Ingestions and various optimizations of data extractions.

ACID Labs — Senior Data Engineer

January 2022

Tech Lead / Senior Data Engineer In the Operation's Area of Walmart Chile.

WOM S.A — Data Engineer

October 2020

Data Developer in a POD, assigned to a logistic and supply chain area of the company.

- Development and Technical design of a Supply chain Control Tower on Google Cloud Platform. It unifies many systems (Oracle and SQL Server Database) associated with the logistic area of the company.

Kibernum — Cloud Data Engineer

Abril 2020

Cloud Data Engineer specialized on Google Cloud Platform.

- Implementation of an Industrial model of Bank risk on Google Cloud Platform. Using tools like Airflow on GCP Composer, Apache Beam on Dataflow, Storage and Bigquery as Data Warehouse. Build of different KPI on Data Studio. I had the role of developer and automation of Airflow DAGS versioned on Gitlab and CI/CD. Also participated in the extraction of Batch Data with Kubernetes.

Price Waterhouse Cooper, Las Condes — Associate

Marzo 2019

Associate on the Center of Artificial Intelligence of PwC Chile.

- Worked on various projects related to Churn prediction, Sentiment analysis and Implementation of a Bank risk model on Google Cloud Platform, with the role of Developer & Data Engineer

PROFESSIONAL CERTIFICATIONS

- ***Google Cloud Certified - Professional Data Engineer.***

Google Cloud Platform Certified
September 2023 - September 2025

- ***Google Cloud Certified - Professional Data Engineer.***

Google Cloud Platform Certified
February 2020 - February 2022

ACQUIRED ABILITIES.

- ☐ Ability on handling Data projects with CI/CD. Developing with practices like TDD/BDD, automation of unit test and integration test, always following the best developing practices.
- ☐ Streaming Database replication to Data Warehouses using Debezium and Kafka.
- ☐ Creation of multiple applications with different purposes on Kubernetes.
- ☐ Knowledge on Python, Java and SQL on different database types.
- ☐ Knowledge on all the Data engineering tools and administration of Google Cloud Platform
- ☐ Software development abilities, design patterns and object oriented programming.
- ☐ Abilities on programming related to the data handling, exploration and transformation, with libraries such as DBT, Pandas, Numpy.

❑ Knowledge on traditional enterprise tools like IBM DataStage, Pentaho, Knime and Visualization tools like PowerBI, Microstrategy, and Datastudio.

ESTUDIOS

DUOC UC, Providencia — Informatics Engineering. February 2020 -

Fundación CaleiSeis, Providencia — Machine learning Specialization.

Agosto 2018 - Enero 2019 (5 MESES)

Intensive programming training about Machine learning fundamentals and Data Engineering.

BootCamp Desafío Latam, Providencia — *Front-end Development*.

Mayo 2018 - Agosto 2018 (4 MESES)

LANGUAGE

❑ Intermediate English B1.
